Authorized to work in Switzerland (Swiss B Permit – family reunification)

EXPERIENCE

Software Engineer

Zurich Insurance 10/2022 - 03/2026 Zurich, Switzerland
zurich.ch

- Developed backend services for a cloud-native Master Data Management (MDM) platform on Microsoft Azure.
- Built Kafka-based event-driven pipelines for real-time synchronization of party data across distributed systems, supporting Golden Record consistency within the MDM platform.
- Designed and delivered cloud-native microservices supporting policy and party data domains within enterprise insurance systems.
- Defined and implemented REST APIs and shared backend libraries used across multiple teams.
- Worked directly with architects, DevOps engineers, and business stakeholders to align technical design with data-governance requirements.
- Deployed and operated containerized applications using Kubernetes, Docker, Helm, Argo CD, and Azure.
- Technologies and tools:** Java, Spring Boot, Apache Kafka, Azure SQL, JPA, Elasticsearch, arc42, UML, OpenAPI/Swagger, Keycloak, Postman, Bruno, Docker, Microsoft Azure, Kubernetes, Helm, Argo CD, JUnit, Mockito, Angular, HTML/CSS, Bootstrap.

Software Engineer

Endava 02/2020 - 08/2022 Belgrade, Serbia
endava.com

- Developed backend features and REST API integrations for Adobe Connect, a large-scale virtual meeting platform, within a custom enterprise framework.
- Technologies and tools:** Java, SQL, REST API, Python, Git, Jira, Splunk, Perforce, HTML/CSS.

Software Developer

MAK System 01/2017 - 02/2020 Belgrade, Serbia
mak-system.com

- Developed backend functionality and adapted JSP-based frontend pages for blood bank management systems (ePROGESA, eDRM) used in production healthcare environments.
- Technologies and tools:** Java, Spring, Servlets, JSP, Hibernate, SQL, SOAP, HTML/CSS, JavaScript, Foundation Framework, Jasper Reports.

EDUCATION

Bachelor's Degree in Information Technology

ITS – Information Technology School

Belgrade, Serbia

Computer Technician

Electrical Engineering High School "Nikola Tesla"

Belgrade, Serbia

SUMMARY

Software Engineer with 6+ years of experience building event-driven, cloud-native systems using **Java**, **Spring Boot**, **Apache Kafka**, and **Azure**. Designed **REST APIs** and microservices for real-time data processing at enterprise scale.

Specialized in **Master Data Management (MDM)**, distributed systems, and **Golden Record** architectures. At Zurich Insurance, I built backend services for a Kafka-based **MDM** platform that synchronizes party data across distributed systems in real time and migrated several **million** Person records into **Elasticsearch** to enable fast, scalable search.

Skilled in deploying containerized backend services using **Kubernetes**, **Docker**, **Helm**, and **Argo CD**.

KEY ACHIEVEMENTS

Designed and implemented a **REST API** (10+ endpoints) for person and organization data, supporting mandatory and optional query parameters, with an **Angular-based UI** for end-to-end validation and testing.

Built a **Kafka event-driven** service that calculates complex domicile addresses by consuming events from one topic and producing processed results to another.

Implemented an end-to-end **Elasticsearch** solution, including migration of **several million** Person records (with Contact Points) from a relational database into Elasticsearch, completing the initial bulk load in under **10 minutes**, plus a scalable **search API** and functional testing-validation UI.

Developed a **shared validation library** for Kafka event processing that validates event attributes, implements postal address fuzzy matching using **Elasticsearch**, and publishes results with field-specific error codes to Kafka topic.

LANGUAGES

English: Fluent

German: A1 (actively improving toward B1)

Serbian, Bosnian, Croatian: Native

PROJECTS

Payment API Service

[Payment processing REST API.](#)

INTERESTS

I was a member and dancer of one of Serbia's oldest folk ensembles, "Abresevic" (founded 1905 in Belgrade), for over 20 years. During this time, I also gained experience working with children as a folk dance instructor.

TECH-STACK

Core Backend Expertise

Java • Spring Boot • Hibernate/JPA • Apache Kafka • REST APIs • Microservices • Event-Driven Architecture • Elasticsearch

Cloud & DevOps

Docker • Kubernetes • Helm • Argo CD • Azure • CI/CD

Frontend

Angular • TypeScript • JavaScript • HTML/CSS • Bootstrap

Databases

Azure SQL • Oracle • PostgreSQL • MySQL

Tools & Platforms

Git • Maven • Swagger/OpenAPI • Postman • Bruno • Kibana • Splunk

Additional Exposure

Redis • Python • PHP
